

# MANAGING HEALTH SUPPLY CHAINS

15<sup>th</sup> - 17<sup>th</sup> DECEMBER, 2021  
18 CPD POINTS | LAKE NAIVASHA RESORT

## TARGET GROUP

Procurement and Supply Chain Management Practitioners  
and Users in public, private and NGO Health Supply Chains.

## INTRODUCTION

Logistics and Innovation in health supply chains is now highly topical area in international research and practice. This is attributable to economic and political factors that turn attention to healthcare issues such as; the process of healthcare corporatization, the emergence of chronic, incurable and lifestyle diseases, the aging population, the increasing demand of healthcare services, rising costs of patient care, new technologies, frequent innovations, endemics and pandemics. To meet the healthcare needs at optimal costs, supply chain strategists should transform and scale-up global health supply chains by exploring supply markets that adapt to evolving client needs and enhance supply chain sustainability.

This workshop is designed to equip SCM professionals, in the healthcare sector, with skills for building healthcare procurement and supply chain systems that will ensure sound sourcing and distribution of healthcare supplies to meet the prevailing health needs in our society.

## COURSE OBJECTIVE

By the end of the workshop participants should be able to:

1. Plan procurement of health supplies effectively.
2. Prepare for emergency procurement in the healthcare sector.

3. Establish resilience and responsiveness in healthcare supply chains.
4. Map and effectively manage stakeholders in health supply chains.
5. Make prudent logistic choices for healthcare supplies.
6. Embrace emerging trends in healthcare supply chain management.
7. Craft terms and conditions of contract that support sustainable supply solutions.

## COURSE DESCRIPTION

### 1. What is healthcare supply chain management?

- Overview of Healthcare Supply Chain Management
- Global Healthcare management
- Healthcare management in Kenya
- Impact of supply chain on healthcare/Why is it important?
- Role of supply chain Managers in Healthcare Management
- Role of government in Healthcare Supply Chain Management

### 2. Complexities of Healthcare Supply Chain

*Exercise: Challenges and opportunities presented by COVID-19 in health supply chains*

- Cold chains
- Supply chain responsiveness and resilience in healthcare supply chains
- Dealing with counterfeit supplies
- Tackling factors that affect purchasing decisions

### 3. Practical Exercise: Developing purchase specifications for given medical supplies

### 4. Building Resilient Healthcare Supply chains

- Local supply vs global supply
- Distribution in healthcare supply chains
- Coordinated response for help
- Documents and design equipment
- Alternative supplies
- Red tape in healthcare supply chain management

*Guided deliberations on global accounts on the distribution of drugs, vaccines, equipment and PPEs*

### 5. Planning in Healthcare supply chains

*Opening Discussion: Procurement Planning in private vs public sector*

- Forecasting in healthcare supply chains
- Lead time in healthcare supply chains
- Cash flow in healthcare supply chains
- Stockout/OOS in healthcare supply chains
- Emergency preparedness: Taking advantage of Procurement Planning.
- Effects of COVID-19 on Project Planning and Management

### 6. Key Stakeholders in the Healthcare Supply Chains

- Healthcare Legislative framework in Kenya
- Role of government in healthcare
- Role of pharma companies in healthcare
- Donor agencies
- Tackling the inequality pandemics
- The role of KEMSA in health supply chains
